

The benefits you love

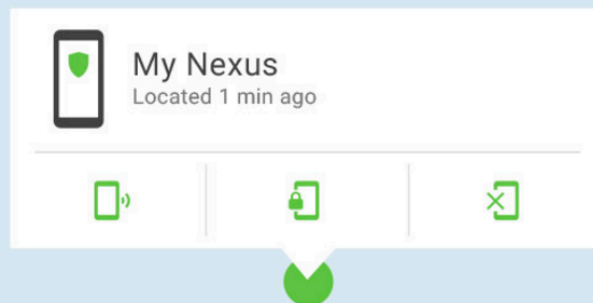

Whether you're racking up miles or earning points, you can continue to do just that with Android Pay. You'll enjoy all the same rewards, benefits, and protections you're used to from your bank.

Your card info stays safe

When you use your phone to pay in stores, Android Pay doesn't send your actual credit or debit card number with your payment. Instead we use a virtual account number to represent your account info – so your card details stay safe and secure.

Peace of mind

If your phone is ever lost or stolen, you can use Android Device Manager to instantly lock it from anywhere, secure it with a new password, or wipe it clean of personal data.
